

About Me

Hello! I'm Sakshi Datir, a passionate tech enthusiast currently pursuing my Diploma in Information Technology (2nd Year). My curiosity drives me to explore the evolving world of Artificial Intelligence and Robotics, where I love turning ideas into real-time applications that make a difference. I have a strong foundation in programming and have completed courses in C, C++, Java, and Python, which I use as tools to bring my imagination to life. Whether it's developing smart systems or exploring the logic behind automation, I thrive on innovation and hands-on learning.

Language

- English

Sakshi Datir

Education

- Completed second year Diploma in Information Technology in Amrutvahini Polytechnic, Sangamner

Work

- **AI(Artificial intelligence)and Robotics**
"Interested in developing AI-powered robotic systems for smarter, faster industrial operations."
- **Electronics**
"Enables smart operations through circuits, sensors, and embedded systems in industrial applications."
- **3D Printing**
"Designing 3D-printable models in Fusion 360 for real-world prototyping and innovation."
- **GUI applicatio design**
"Design GUI application using python in VS code and thonny."

Skills

- C(Programing language)
- PYTHON
- Java(programing lanugage)
- C++(Programing language)
- Graphic Design
